The decreatic consumption was cut down in 18:6-87 by a short crop and high prices. The same cause, with the war of Bussla, size tended largely to diminish experts to all foreign countries.

The parity of 1857 seriously interfered with the distribution of the copy of 18:7-52; it also, by stopping American spindles, reduced the demestic consumption to 284,000 bales, sgainst 687,000 bales, the previous year-oqual to a reduction of 183 06 bales. The expects were also diminished to France 28,000, and to the north of Europe 21,000 bales. also diminished to France 29,000, and to the north of Europe 21,000 bales.

In our estimate of the crip of 1856-89, or that now coming to market, at 8 400,000 bales, we assign its distribution as rollows: We give to Hagiand the same amount
she tot last rear; to France we give an increase of
65,000 bales; to the North of Europe, which includes
Eussian ports, 25,000; and to other for her ports the
same as last year; and for American stock and consumption an increase of 185,000 bales.

Last year American spindles were life; they are now
fully cumployed, and hence we give for American consumption an amount which is not greatly in excess from
